SUMMARY

AI Software Engineer building scalable backend systems, LLM-powered workflows, and AI automation tools using Python, FastAPI, PostgreSQL, Docker, and Linux.

EXPERIENCE

AI SOFTWARE ENGINEER

UNIT 1991 | JAN 2025 – PRESENT

- Developed backend systems that process and classify thousands of content records daily using AI-assisted workflows.
- Created LLM-driven parsing pipelines that automate extraction and normalization of data from 100+ web sources, significantly reducing manual processing effort.
- Optimized database architecture and query performance for content-processing systems handling data from 100+ web sources.
- Maintained containerized infrastructure supporting continuous operation of AI-driven data processing and scraping services.

PROJECTS

EVENT PLANNER BACKEND (FASTAPI + POSTGRESQL + DOCKER)

- Built backend system for event scheduling and conflict resolution using FastAPI and PostgreSQL.
- Implemented async workflows and Docker-based deployment.

AI-ASSISTED CONTENT PROCESSING SYSTEM

- Built AI-powered content ingestion and classification systems using Python, FastAPI, PostgreSQL, and LLM APIs.
- Automated collection and processing of data from 100+ web, news, and social media sources through custom scraping and parsing infrastructure.
- Designed scalable database schemas and asynchronous processing pipelines, enabling efficient handling of large-scale content datasets.
- Containerized and deployed backend services with Docker and Linux, streamlining development, testing, and production workflows.

SKILLS

- Python, C++, SQL
- FastAPI, Django, PostgreSQL, SQLAlchemy
- Docker, Linux, Nginx
- LLM Integration, AI-assisted Parsing, Scraping Infrastructure
- REST APIs, Async Programming
- GitHub Actions, CI/CD, Automation

EDUCATION

YEREVAN STATE UNIVERSITY | SEP 2022 – PRESENT

BSC IN INFORMATICS AND APPLIED MATHEMATICS

PICSART ACADEMY | APR 2023 – MAR 2024

CERTIFICATE IN COMPUTER SCIENCE AND PROGRAMMING FUNDAMENTALS

LANGUAGES

- English
- Russian
- Armenian
